DETAILED ACTION

1. This office action is in response to application 10/647,608 and RCE with IDSs filed on 10/4/2005. Claims 1-15 remain pending in the application.

EXAMINER'S STATEMENT AS TO THE REASONS FOR ALLOWANCE

2. Claims 1-15 are allowed over the prior art of record.

3. The following is an examiner's statement of reasons for allowance: the prior art of record does not teach or fairly suggest a method/system for determining unmatched design elements in a circuit comprising a combination of the steps of determining instances of a first type and a second type of the design elements that are connected to a specific node in the circuit; storing a gate signal name for each said determined instance of the first type of the design element in a first list; storing the gate signal name for each said determined instance of the second type of the design element in a second list; determining a cumulative design element characteristic value by summing a design element characteristic for each said determined instance of the first and the second types of the design elements; storing the cumulative design element characteristic value in association with the gate signal name; performing a set difference operation on the first list and the second list to determine orphan gate signal names that appear in either one of the lists but not in both lists; and determining a cumulative value for said design element characteristic, by summing the design element characteristic value corresponding to each said first type of the design element gate signal name that

Art Unit: 2825

matches one of said orphan gate signal names, to produce a total design element characteristic value.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
